Galaxy Tab S7, S7+, S7FE	11-12.4"	No	No	Yes	Yes	Recommended Upgrade Android

Note: No = either the tablet is not Bluetooth compatible, does not fit (too large or small in that orientation) or it will make the Kubi top heavy in that orientation. Button interference with arm ends is considered a "not fit".

Note: Compatibility requires Bluetooth 4.0 or higher independent of tablet brand

Note: Kubi is not compatible with tablets using MS Windows OS or Amazon Fire OS. Windows computers/tablets can be used to control a Kubi but not as the Kubi tablet.
