

USB-C Adapters for the **Kubi Enhanced Audio Kit**

Kubi's Enhanced Audio Kit was originally designed for the Kubi Secure model with a 9.7 inch iPad. The Enhanced Audio Kit can also be used with the Kubi Classic and Kubi Plus models, however, there are limitations with some tablets.

Newer (2018-2019) iPad PRO 11" and 12.9" models no longer have the 3.5 mm Audio Port required by the Enhanced Audio Kit's microphone. Charging and Input/Output, including audio, are combined in a single USB-C port on these PRO models. An adapter is required to connect both the microphone and a charging cable when installing the Audio Kit.

We do not recommend the Audio Kit for Kubi Plus with the 12.9 inch USB-C only iPad due to port interference.

Xandex has tested and recommends the following adapter for use with USB-C only iPad 11 inch model:

Basevs 2-in-1 Type C to 3.5mm Adapter for Headphone Compatible with iPad Pro 2018.

[Available from Amazon for \\$17.00.](#)

The Kubi Enhanced Audio Kit comes with a 5 port USB charger with USB-A ports.

To use the USB-C charging cable that comes with new USB-C only iPads, an adapter is required. Xandex has tested and recommends the following USB-A to USB-C adapter:

Electop Updated USB 3.1 Male to Type-C Female Adapter

[Available from Amazon for \\$9.00](#)
