

# USB-C Adapters for the **Kubi Enhanced Audio Kit**

**Kubi's** Enhanced Audio Kit can be used with the Kubi Secure, Kubi Classic and Kubi Plus models, however, there are limitations with some new iPad tablets.

The (2018-2020) iPad Air 10.9", iPad PRO 11" and 12.9" models no longer have the 3.5 mm Audio Port required by the Enhanced Audio Kit's microphone. On these models, charging and Input/Output, including audio, are combined in a single USB-C port. An adapter is required to connect both the microphone and a charging cable at the same time.

*We do not recommend the Audio Kit for Kubi Plus with the 12.9 inch USB-C only iPad due to port interference.*

Xandex has tested and recommends the following adapter for use with iPad Air 10.9 inch and iPad Pro 11 inch models:

**Basevs 2-in-1 Type C to 3.5 mm Audio Adapter for Headphone. Compatible with iPad Air and iPad Pro 2018-2020.**

[Available from Amazon for \\$17.00.](#)

The Kubi Enhanced Audio Kit comes with an AC/USB charger with 2 USB-A ports and 2 100V-120V AC ports. We recommend charging the iPad using the iPad's AC charger plugged into one of the AC ports.

To use the supplied USB A ports, a USB-C adapter is required. We tested and recommend the following USB-A to USB-C adapter:

**Electop Updated USB 3.1 Male to Type-C Female Adapter (does not support PD fast charging)**

[Available from Amazon for \\$10.00](#)
